Reference: WTTW Siding Project

Dear Mr. Rabin,

Our client, WTTW, was having trouble with water infiltration on a brick sided penthouse located above one of their busier sound stages. The solution was to install insulation and metal siding around the entire penthouse, completely covering the exposed brick. The owner naturally wanted to match the color and profile of an adjacent penthouse, already clad in metal. Unfortunately, the manufacturer of that particular product no longer produced that profile.

A-1 Roofing was able to custom fabricate the panel and match the existing color as well. In addition, faced with a two day window of opportunity, A-1 Roofing was able to accommodate the needs of our client's production schedule and had the siding installed as promised.

From start to finish, your attention to detail and professionalism was greatly appreciated. Thanks again for a job well done.

Sincerely,

THE GEORGE SOLLITT CONSTRUCTION CO.
